

A 17-Year-Old's Death Points to Flaws in Concussion Test

Kenny Bui died in 2015 after being cleared to play football weeks after a concussion. The largest-ever study of athlete concussions now indicates many athletes are similarly being sent back on the field while at heightened risk of injury.

Everyone said Kenney Bui was fine to return to the football field.

The 17-year-old defensive back at Washington's Evergreen High School, where he kept a 4.0 grade-point average, suffered a concussion in a game on Sept. 4, 2015.

Two weeks later, a doctor cleared Bui to begin practicing again. Bui also passed a
